Old school **vs** New school  
WHO STOLE THE WORKPLACE REVOLUTION?

CLASSICAL MODERNISM IN DENMARK  
NOTTINGHAM DUO & THEN DESIGN  
FIT OUTS FOR COMPANY MERGERS

## JOHN GALVIN

John Galvin designs innovative creations that combine contemporary, bespoke design with quality craftsmanship. Pictured is a sideboard with a frame made from MDF and legs made from solid tulipwood, both finished with a high gloss white lacquer. The touch release doors are manufactured from solid oak and finished with a clear lacquer.

## INTERFACEFLOR

InterfaceFLOR's stand at the Ecobuild exhibition in March will be concentrating on showing its clientele that sustainability is a key driver in both the innovation and design of its carpets. InterfaceFLOR designs, manufactures and supplies carpet tiles for designers and architects in the public and private, commercial and residential sectors. Entropy carpet tiles, pictured, have been designed to simulate the random patterns, shades and colours of nature's floors, such as forest leaves or pebbles on a beach.

## MOVISI

Lyta is an ergonomically shaped lightweight armchair that weighs as little as 11kg. The cushions and covers are easy to remove for washing. All components are individually replaceable, which means that you don't have to replace an entire chair and because the frame is made from emission-free and allergy-friendly ARPRO expanded polypropylene, it's 100 percent recyclable.

## MALAFOR

The Blow Sofa by Malafor is made from 100% recycled paper dunnage bags with a metal rack and rubber straps. It is easy to transport when flat and simple to inflate. Each section can be personalized with a pen and if the cushion gets dirty, it is inexpensive to replace. When inflated the sofa measures 180cm W x 90cm H.

## GRADO ZERO ESPACE

A new generation light source called re LIGHT is based on electro-luminescent technology by Giada Dammacco and the GZE design team. It is a soft, shining fabric with physical-mechanical properties that make it lightweight, foldable, durable and eco friendly. The panel can be customised in shape, dimension and colour, and contains no mercury or other toxic substances. Re LIGHT is so versatile that it could be used to great effect in the fashion, packaging, automotive, boating or aerospace industries.
